

PATIENT INFORMATION

PREPARATION OF THE PATIENT FOR THE ANGIO-CT OF CORONARY ARTERIES AND CARDIAC CT

1. **On the day of the examination, the patient should take all of his/her cardiovascular medications while drinking only a small amount of water.**
2. Please provide full cardiological documentation (hospital discharges, test results e.g. Echo, exercise test) along with a list of medications you are currently taking.
3. The examination is ALWAYS performed on the basis of a referral issued by a specialist.
4. On the day of the examination you will need to bring an ID with a photo
5. On the day of the examination do not take any food or drink **5 hours before the scheduled time of the examination**
On the day before and after the examination, the patient should drink at least 2 litres of fluids.
6. Because of the possible intravenous administration of a contrast agent, serum creatinine test or GFR determination should be performed:
 - 3-7 days before the planned CT examination – refers to people with kidney disease, diabetes and taking nephrotoxic medications
 - 30 days – other patients
7. In the case of thyroid diseases (both hyper- and hypothyroidism), the patient must carry a serum TSH level result which is not older than 30 days.
8. **IMPORTANT information for diabetic patients:** Patients taking oral antidiabetic medications containing METFORMIN (METFORMAX, GLUCOPHAGE, GLURFORMIN, SIOFOR, METFOGAMMA, FORMETIC, AVAMINA, ETFORM, METFORMIN, METIFOR) may take these medications if GFR is = or is above 60 ml/min
9. In the case of an examination performed on minors, written consent of parents or legal guardians is required, as well as their presence during the examination.
10. CT results can be collected at the RECEPTION in person or by an authorised person – an authorisation form is issued at the reception

ON THE DAY OF THE EXAMINATION IT IS NECESSARY TO PRODUCE AN ID

Examination date:	Time of examination	Receptionist's signature
